

FROM MVP TO PRODUCT READY

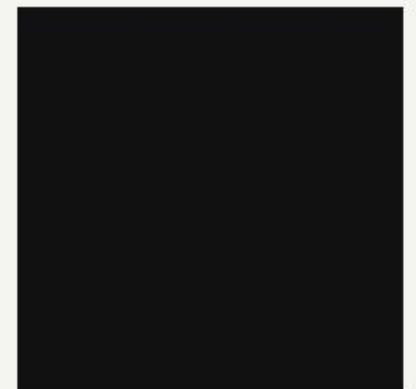

Learn the 4 essential steps to transition smoothly.

Step

1: Gather User Feedback

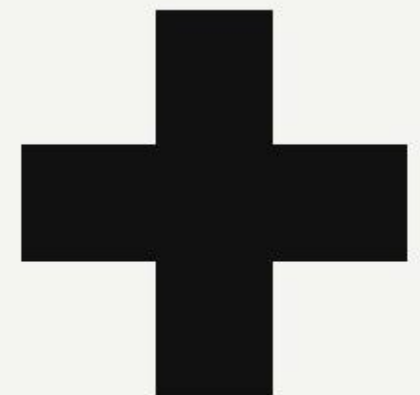

Collect insights from users about their experiences and challenges with your MVP.

Step

2: Prioritize Features

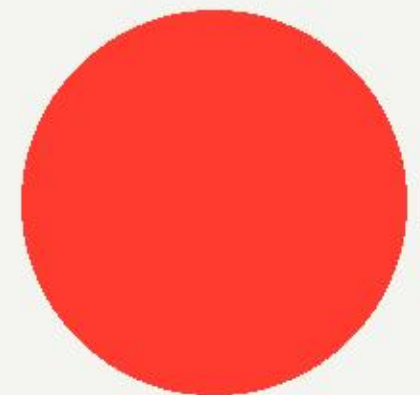

Focus on the features that add the most value based on user feedback.

Step

3: Build a Scalable Infrastructure

Ensure your product can handle growth by optimizing architecture and technology.

Step

4: Implement CI/CD

Streamline updates and maintain stability by adopting CI/CD practices. Comment 'READY' for more insights.
