FROM MVP TO PRODUCT READY

Four steps to transition your MVP into a market-ready product.
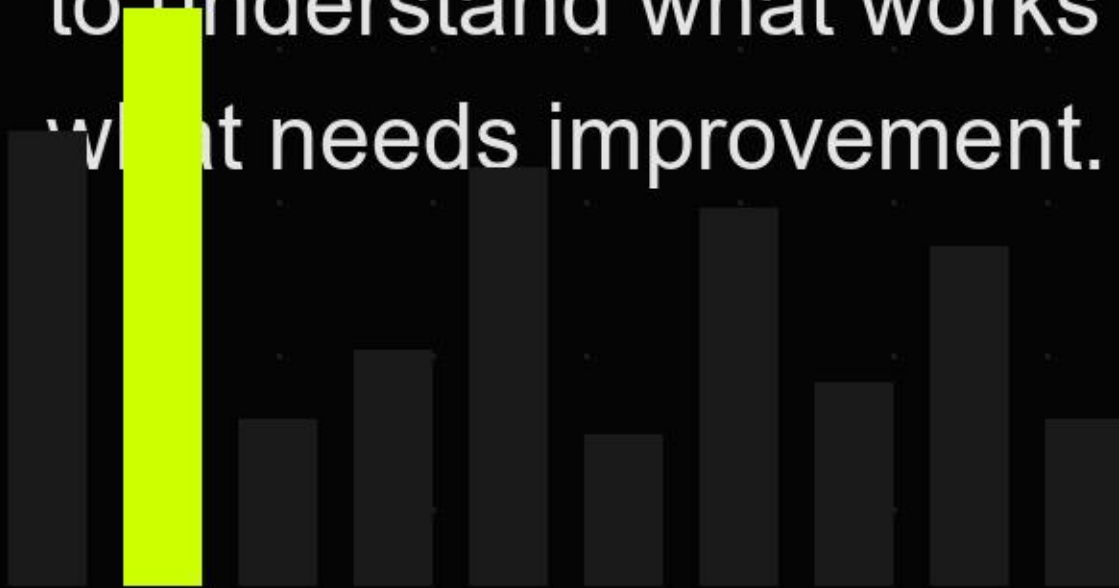

01

Gather
User Feedback
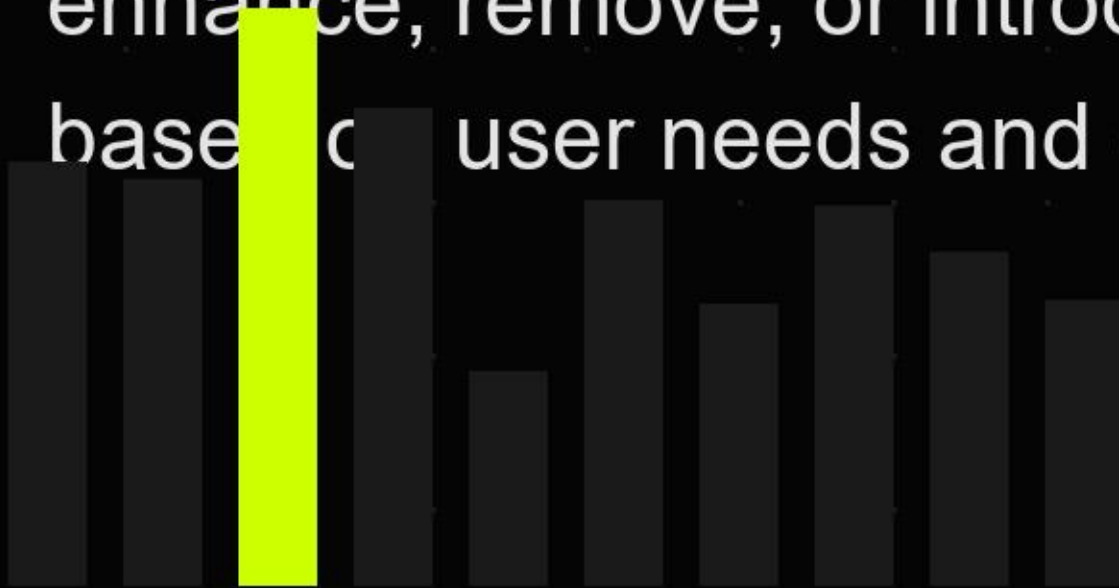

Collect and analyze feedback to understand what works and what needs improvement.

02
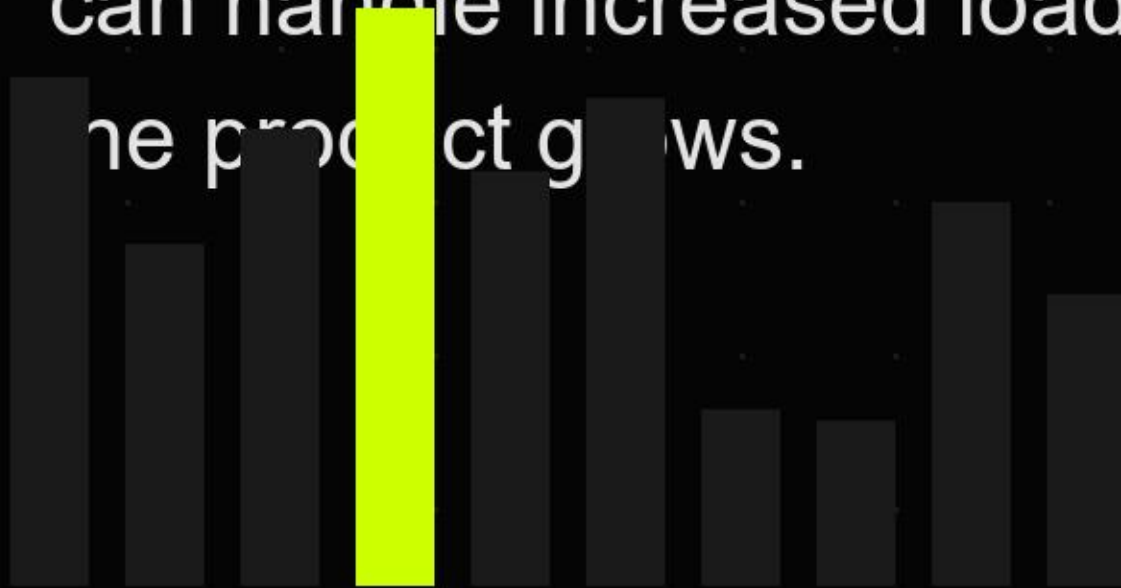

Prioritize
Features

Decide which features to enhance, remove, or introduce based on user needs and goals.

03

Build
Scalable Infrastructure

Ensure your technical setup can handle increased load as the product grows.

04

Ensure
Robust Testing

Implement testing strategies to fix bugs and enhance user experience

05
