FROM MVP TO PRODUCT READY

Learn the 4 essential steps to transition smoothly.

01

Step
1: Gather User Feedback

Collect insights from users about their experiences and challenges with your MVP.

02

Step
2: Prioritize Features

Focus on the features that add the most value based on user feedback.

03

Step
3: Build a Scalable Infrastructure

Ensure your product can handle growth by optimizing architecture and technology.

04

Step
4: Implement CI/CD

Streamline updates and maintain stability by adopting CI/CD practices. Comment 'READY' for more insights.
